**THE NETHER**

**3 KILLER TRACKS**

**AVAILABLE ON ALL STREAMING PLATFORMS - OCTOBER 14TH 2018**

**rainmakers** are proud to announce the release of their 3-track EP **'The Nether'** available on all streaming platforms today.

**rainmakers** are an electro-punk duo out of New York City - they've been writing, recording and touring their own high-octane electronic glam fusion around the north-east for the past 4 years.

**Evan Russell Saffer** - lead vocalist extraordinaire Evan has fronted several killer rock bands and is a veteran road-warrior having toured the country extensively for years with his band Fixer. He brings soaring rock-god vocals and in-your-face performance with a twist of unpredictability and danger to the stage. His writing reflects the dichotomy of edgy and outrageous hedonism in the land of the Nether with the search for tranquility and inner peace within.

**Martin Kestner** - digi nomad and audio nerd, Kestner aka DJ Laptop has been soaking up electronic music like a sponge since his early days of raving and hanging out in warehouse parties and fields in the UK. Having transplanted to NYC (in search of the musical DNA that inspired so many of his heroes), he's found working with Evan to be a unique opportunity to combine crusty samples, dance beats and basslines with a high energy vocal and guitar delivery. His sound inspired by the early days of rave tends to have many interweaving short motifs and catchy hooks on a bedrock of banging beats.

**The Nether** is a collection of 3 favorite songs from **rainmakers** selection of original material that have been road-tested over the past few years. Mixed in the legendary PowerStation Studios NYC by **Roy Hendrickson** on an SSL desk using a plethora of outboard gear, the record has a retro 80's warmth which couples perfectly with the modern production values.

Listen on Spotify: [@dj.kestner](#)  
Soundcloud: <https://soundcloud.com/rainmakers/sets/the-nether>

1. **Ocean Of Commotion** - the soundtrack for the Nether and a call to arms for those that abide there, an 80's sounding sultry vocal which shifts up several gears on the soaring chorus, blended with a tapestry of synth riffs and edgy guitar sounds.
2. **Gimme A Kiss** - a melodic reflective ballad verse accompanied by a platter of sweet sample and synth candy leads into a heavily intense banging chorus demanding the listeners pay attention.
3. **Red Light Lovin'** - a classic 70's rocker guitar riff with super catchy vocals and synth embellishments leads into a soaring sing-along chorus with nasty guitars and grinding synth accents. This song screams hedonism right up in your face.

**rainmakers** have a video for **Ocean Of Commotion** featuring some of the fantastic creatures from the Nether available on their 'rainmakers' youtube channel or directly here: <https://youtu.be/YdbXHidrTJQ>
